Complete EHS Service Pacakage

3S LIFE SAFE AKADEMIE excels in delivering top-notch services in the field of Environment, Health & Safety, catering to a wide range of construction projects and operational industries in India such as giving OSH trainings to L&T Bullet train projects teams. Our expertise spans mining, metal, chemical, pharmaceutical, petrochemical, oil and gas, fertilizer, consumer goods, public utilities, power sector (including atomic power plants), and high-tech installations. With our skilled trainers and customized training programs, we ensure quality and cutting-edge solutions for our clients.

Our training programs are designed to help you achieve and maintain certification for regulatory compliance at the state, central, and local levels. At 3S LIFE SAFE AKADEMIE Services and Solutions, we provide a comprehensive suite of strategic, management, and technical consulting solutions. This includes assessment, compliance, risk management, reporting, training, and communication. By partnering with our clients, we assist in meeting their short-term environmental, health, safety, and sustainability needs, as well as their long-term goals.

The well-being of your workers and the success of your business rely on a strong health and safety foundation. Let us support you in protecting your employees, reducing costs, and enhancing your brand reputation. We take pride in comprehending our clients' processes, people, products, values, and business objectives. Our services have benefited various sectors such as technology, manufacturing, industrial work, telecom, business services, energy and utilities, construction, clean technology, and government.

Our team of highly skilled EHS consultants possesses extensive industry experience, complemented by strong technical and business acumen. We offer on-site support to supplement your existing staff or lead the implementation of new initiatives, saving you the need to invest in permanent headcount.

Investing in the protection of your people and the environment goes beyond mere compliance and liability management. It yields substantial returns in terms of corporate reputation, social value, and your bottom line. Thus, 3S LIFE SAFE AKADEMIE serves as a growth partnership and advisory services company, enabling clients to achieve transformational growth through holistic environment, health, and safety (EHS) solutions.

First aid with CPR-AED Training

Accidents can happen anytime and anywhere – at home, on the road, at a public place like the mall or a park, and also the workplace. Even may occur. 3S LIFE SAFE AKADEMIE First Aid with cpr-aed course for employees in the workplace providing life saving knowledge in first aid, emergency first aid as well as recognition and management of illness and injury.

The use of first aid applies to all kinds of working environments even in the offices. First aid education can save lives in situations of an employee falling ill or being involved in an accident. The managers and supervisors at the workplace are expected to be highly proficient when it comes to the administration of first aid for minor accidents and severe emergency situations. With this knowledge, the supervisors will be in a better position to protect the employees in any dangerous situation.

There are many kinds of medical and health challenges that will require an immediate first aid before the patient is rushed to the hospital. The implications of a poor first aid training can reach as far as legal implications that can be bad for the reputation of an organization. A well trained employee will be more confident in working under a management that has shown they are committed to protecting their employees in the workplace.

The costs of enrolling employees in first aid training classes can be quite discouraging. Many organizations try to cut costs by training only few members of their work crew. However, the amount saved in this way is nothing compared to the costs if an accident happens and an employee ends up hurt.

Fire Safety

Training & Audits

Within any commercial setting, it's a legal requirement for certain members of staff to be trained in fire safety procedures – becoming your environment's designated fire expert as a result. The person trained should have a clear understanding of the overall duties and responsibilities they have as a fire safety expert. This will include: what action they should take on the discovery of a fire, know the difference between different fire classes, which extinguisher agents to use for which fire and about the evacuation procedure to save human life. Fire Safety Training Course is also designed to train all staff to use fire extinguisher and to follow to your emergency procedures.

A Fire Safety Audit is an examination of your business' premises and relevant documents by fire safety inspectors, to ascertain how your premises are being managed with regards to fire safety. This audit is a systematic and independent evaluation of the fire risks present in the premises and involve recommendations about appropriate measures to control and mitigate the effects of fires. Organizations applicable for Fire Safety Audit: Industry bodies, Offices, Hotels, Corporate Houses etc.

3S LIFE SAFE AKADEMIE Conduct both level training i.e. Basic for worker (01 day with certification) & Advance for supervisor Engineer & senior management (02 days with certification)

Height & Safety Training

EQUIPS TECHNICIAN AND WORKERS WITH THE KNOWLEDGE AND SKILLS TO SAFELY WORK AT HEIGHT IN VARIOUS SITUATIONS. AND IN-DEPTH TRAINING FOR SUPERVISORS OF TEAMS WORKING AT HEIGHT, AND ANYONE NEEDING TO DEVELOP AND TEST RESCUE PLANS FOR WORK AT HEIGHTS. CONTAINS A SCIENTIFIC & PRACTICAL RESCUE COMPONENT AND TRAINING.

● WORK AT HEIGHT

Falls from height remain the most common cause of workplace fatality. 3S Training has the right course to equip your workforce with the necessary skills and knowledge to prevent accidents when working at height. It's an explicit requirement of current legal compliance that workers must not be placed at risk at any time throughout the course of their work. As a result, there are many safety regulations you need to be aware of and stay up to date with while performing 'Work at Height'.

● MATERIAL LIFTING

Lifting heavy items is one of the leading causes of injury in the workplace. Strains and sprains from lifting loads improperly or from carrying loads that are either too large or too heavy are common hazards associated with manually/tools moving heavy materials. Use of mechanical means (e.g. hand trucks, pushcarts, etc.) when possible for heavier or awkward loads. It is important to obtain training and authorization before using a tools/machine for heavy lifting.

Confined Space

(safe entry Training)

THE CONFINED SPACE TRAINING PROGRAM APPLIES TO ANY PRIVATE OR PUBLIC DEPARTMENT THAT HAS SPACE(S) THAT MAY POTENTIALLY BE HAZARDOUS WHEN ENTERED. A CONFINED SPACE IS ONE CONFIGURED SO THAT A PERSON CAN FULLY ENTER AND WORK, BUT IS NOT DESIGNED FOR CONTINUOUS HUMAN OCCUPANCY AND HAS RESTRICTED OR LIMITED MEANS OF ENTRY OR EXIT. CONFINED SPACES MAY CONTAIN HAZARDOUS/TOXIC AND FLAMMABLE GAS & FUMES THAT CAN INJURE WORKERS OR QUICKLY LEAD TO DEATH BY MEANS OF INHALATION OR FIRE EXPLOSION DURING HOT WORK LIKE WELDING, CUTTING, GRINDING ETC. UNTRAINED AND ILL-EQUIPPED RESCUERS CAN EASILY BECOME VICTIMS THEMSELVES. EXAMPLES OF CONFINED SPACES AT UW MAY INCLUDE, BUT AREN'T LIMITED TO:

- BOILERS
- VESSELS AND TANKS
- STORAGE BINS
- UTILITY VAULTS
- SUMPS AND PITS
- EXCAVATIONS
- SEWERS
- ATTICS, PLENUMS AND CRAWLSPACES
- LIFT STATIONS
- AIR HANDLING UNITS
- COOLING TOWERS
- TUNNELS AND PIPELINES

3S LIFE SAFE AKADEMIE TRAIN WORKERS & TECHNICIAN AND ASSISTS INDUSTRY WITH DEVELOPING, MAINTAINING AND IMPROVING THEIR CONFINED SPACE SAFETY PLANS.

3S LIFE SAFE AKADEMIE HAS OWN FULL SET UP AT THEIR NCR SITES FOR SUCH TYPE OF TRAINING FOR PARTICULAR BATCH OF 25 PARTICIPANTS PER DAY. A FULLY- EQUIPPED CLASSROOM & UNDERGROUND TUNNEL WITH PROPER 24 V LIGHTING, SCBA SETS, OXYGEN & EXPLOSIVE METER, CHROMOTO- GRAPH, PTW, DISTRESS SIGNAL UNIT WITH 24 VOLT DC SUPPLY. THIS TRAINING IS EXECUTED BY SENIOR HSE PROFESSIONALS & EXPERTS.

Defensive Driving & Road safety training

The leading cause of occupational fatalities is vehicle-related crashes. 3S Life Safe akademie has been actively working to reduce motor vehicle collisions for many years. We lead the way to reduce traffic crashes, helping save lives. Thousands of companies – Fortune 100 corporations, small businesses, nonprofits and community service agencies – all depend on 3S LIFE SAFE AKADEMIE to educate their employees and professional drivers.

Employers pay significant costs associated with motor vehicle crashes. When employees are involved in traffic incidents, companies are exposed to liability risks and legal expenses, not to mention lost time, decreased productivity and increased insurance and workers' compensation rates. Implementing a driver safety program, will help your organization keep employees safer and can potentially:

- Decrease risk of motor vehicle collisions and traffic violations
- Minimize exposure to liability risks and legal costs
- Reduce insurance premiums and workers' compensation claims
- Lower vehicle repair bills and replacement expenses
- Protect business operations and brand identity

3S LIFE SAFE AKADEMIE developed practical tools and systems including an interactive training methodology for Road Safety.

The entire course is covered by classroom Lectures session, supported with visual aid, Video Films, and Multimedia Presentations.

Ergonomics Based

III Health & safety

Ergonomics is the science of designing the workplace, keeping in mind the capabilities and limitations of the worker. Poor worksite design leads to fatigued, frustrated and hurting workers. This rarely leads to the most productive worker. More likely, it leads to a painful and costly injury, lower productivity and poor product quality.

A systematic ergonomics improvement process removes risk factors that lead to musculoskeletal injuries and allows for improved human performance and productivity.

Industrial environments vary from factories with hundreds of operators performing short-cycle jobs to field personnel conducting non-routine tasks. 3S LIFE SAFE AKADEMIE ergonomists are experienced in finding practical solutions to shop-floor challenges and can teach you to spot and resolve developing ergonomics concerns by providing the tools and techniques to identify issues, prioritize challenges, and implement low-cost, high-impact solutions.

Managing today's modern office workplace includes a challenge to maintain a stimulating and healthy work environment for your employees. Office ergonomics is made easy when you utilize 3S LIFE SAFE AKADEMIE's systematic approach to identifying and resolving ergonomics issues with no-cost and low-cost solutions. 3S LIFE SAFE AKADEMIE's ergonomics training courses for the office combine easy-to-apply assessment methods with data drivers and cost justification.

With a long and diverse client list, 3S LIFE SAFE AKADEMIE has been able to develop training solutions for a variety of workplace applications and settings. In addition to industrial and office ergonomics training, 3S LIFE SAFE AKADEMIE offers ergonomics courses designed for the specific needs of several key groups, which include course manuals, presentation materials, and case study exercises to ensure that participants gain the skills they need to be successful.

Behavior Based Training

Safety is a series of choices made by workers each day, choices involving behaviors in the workplace. It's in how you train, what precautions you take when performing tasks, and your level of awareness to external factors that may jeopardize your wellbeing. You might say that 'safety' is in how you confront the sum total of different considerations with the potential for negatively impacting personal health.

There are three factors that influence personal safety choices: the ability to recognize hazards and evaluate risk, the motivation to be safe, and the ability to focus while performing the current task safely.

Behavior Based Safety is a program designed to influence employee actions toward safer outcomes, ideally by preventing an accident or injury before it occurs. Implementing a behavior based safety program is the most comprehensive way for companies to promote safety, eliminate hazards and prevent injuries.

When implemented correctly, a behavior based safety program can provide positive rewards to change unsafe behavior, reduce job-related injuries, minimize lost production hours, and improve workplace morale—essential ingredients for creating a strong safety culture. Behavior Based Safety matters because upwards of 80% of all accidents occur due to the choices we make and how we act—that is, our behavior. Safety is to a great extent under our own control. Unsafe acts, rather than unsafe conditions, are the root cause of most incidents.

3S LIFE SAFE AKADEMIE provide international standard Behaviour based training as per industry need and customized according to work environment on two modules i.e Basic & Advance at different stages.

Stress Management Training is a vital component of Managerial Training conducted by 3S LIFE SAFE AKADEMIE's Training Solutions. We focus on teaching stress management techniques which have been helping employees to handle everyday situations in a more constructive manner to get high performance . Stress management training, an integral part of soft skills, focuses on a variety of practices intended at monitoring and understanding the stress levels an employee goes through. Participants are also trained on the usage of different methods to effectively manage their stress and at the same time still be productive.

In our Corporate Training programs the aim of stress management is to attain a calm mind set and bring your life under control in addition balance your nervous system. Being able to control your life would mean balancing all parts of it whether it is professional, personal relationships and leisure. It also included physical, intellectual and emotional parts. People who manage stress effectively, look at life from the perspective of it being a challenge to overcome instead of problems and irritations. Hence, even when they are faced with a setback, they are always in control

Stress is reached when there is a sustained imbalance of internal tension. In stressful situations, your ability to respond and think with clarity and do things effectively is trimmed. This is why it is extremely crucial to continually use stress management techniques to manage stress.

Through our Stress Management Training, participants have been able to gain a better understanding of themselves and their response to stressful situations. This has enabled them to effectively function in all areas of their life.

Emergency Preparedness Training

Emergency preparedness refers to the steps taken to be ready to respond to and survive during an emergency. Some examples of large scale emergencies that are typically thought of when discussing emergency preparedness include natural disasters (hurricanes, earthquakes, tornadoes, flooding), wide spread disease outbreaks (avian flu), terrorist attacks and industrial disasters like major fire, explosion, Toxic release etc.

For individuals or employees, emergency preparedness might also include plans to respond to a building fire, an extended power outage or an evacuation.

Government agencies, communities, businesses, hospitals and emergency responders spend significant time, resources and monies preparing for these emergencies. These preparations include planning and mock drills.

The government advises corporate and Industries to have their own emergency plans including an emergency kit, an employee emergency plan and a employee communications plan.

It is very important to rehearse your company emergency plan on a regular basis as per statutory norms its once in every six months. It is also advisable to check your kit to be sure that the supplies are in working order and the basic amenities and tools food/water/fire extinguisher/first aid kit & medicine etc. has not expired.

Nebosh Courses

Qualification /
Certification Training

We take pride in offering comprehensive NEBOSH courses both online and Offline at our office, For Individuals and Corporate Bulk Training too for their Employees providing with the necessary training to excel in the field of health and safety.

Our extensive course offerings include:

3S LIFE SAFE AKADEMIE:

Globally Accredited with NEBOSH & IOSH For Occupational Health & Safety

The scope of occupational health and safety in India is expanding rapidly, driven by the advancing regulatory norms as well as organizational commitment towards health and safety at the workplace. To implement best practices, the requirement for optimal training solutions by certified and accredited institutions are increasing including the career opportunities for health and safety professionals are huge in demand globally.

3S Life Safe Akademie, India's fastest-growing, prestigious institute in occupational health and safety, founded in 2016 shines as a beacon of hope. Offering a comprehensive range of qualification programs, training and certifications, the institute stands as a well-renowned academy and a preferred partner by top global businesses.

Qualifications, Training & More

3S, is an ISO 9001:2015 QMS certified institution, offering a comprehensive range of courses with well recognized accreditations from NEBOSH, IOSH, (United Kingdom), for courses like NEBOSH IDIP-Level 6, IGC, PSM, HSW and IOSH - Managing Safely including various recognized diploma and PG diploma courses in fire and industrial safety management like ADIS and PGDIS. In addition, 3S has accreditation with Exemplar Global for an ISO Lead Auditor courses like ISO 45001, 9001, EOSH, UK for CPD certificates.

The institute caters to the requirements of corporate organizations, by offering dedicated corporate training services like EHS training include Ba-

sic Life Support (BLS), CPR Training, construction safety training, chemical safety training, industrial safety training, defensive road driving training, fire safety mock drill training, risk assessment training, working at height training, ergonomics training, behavior based safety training, first aid training, manual handling training, and many customized trainings.

"At 3S Life Safe Akademie, we are emphasizing that health and safety should be the priority for everyone and everywhere. We have successfully demonstrated our skills to improve health and safety awareness among organizational employees for over 650 corporate clients and trained more than 25,000 employees. We are committed to creating a appropriate health and safety culture and its importance in our society at all the workplaces", shares Subhash Kumar, Director.

Over the years, 3S has achieved prestigious GOLD learning partner status with NEBOSH, UK. Moreover, the company has corporate membership of British Safety Council, UK, and FSAI. The institute stands out for its exceptional quality of services and training, carried out by a team of excellent tutors, trainers that take an application-based teaching methodology, practice and performance-oriented approach to drive success of the teaching endeavors.

Since its inception, the company has evolved extensively, marking its presence across the central government, PSU, and private sectors. Within this capacity, 3S has served a range of prestigious clients including IOCL, L&T, Tata, Voltas, Toyota, ITD Cementation, TESCO, DRDO, IISc, Hitachi, Enel Green Power, Gainwell-

Subhash Kumar
Director

Catapillers, Brookfield, and many more.

In order to drive client success, the institute assists organizations in identifying potential hazards, and implementing effective health and safety protocols. To make its workshops and training programs more client-friendly, the institute leverages technological tools such as virtual training through interactive sessions conducted via Zoom. This also allows it to connect with its global clientele hassle-free. 3S also offers e-Learning opportunities which act as a self-learning platform while face-to-face offline sessions with audio and video are also offered.

Future Roadmap

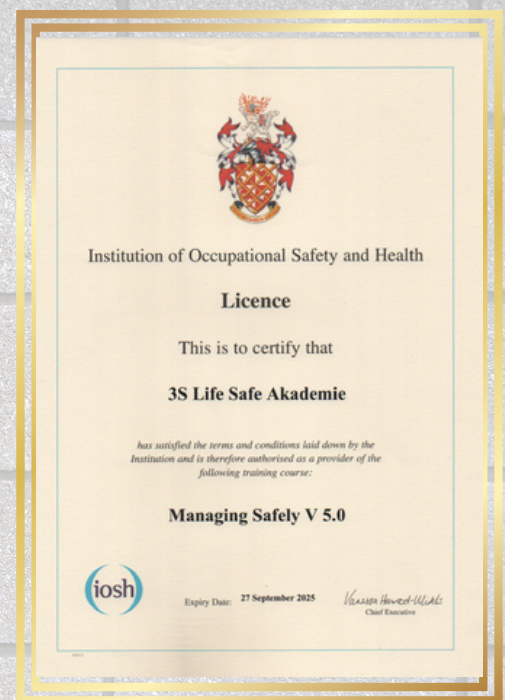

With a stellar background, 3S has big plans for its future growth, focused on including its global reach and advancement by incorporating latest technologies, gaining accreditation from highly valuable global bodies, and promoting the importance of Occupational Health and Safety Management System (OHSMS). With these diverse strategies, 3S is poised to lead the evolution of the sector. ■
